

Apacer

CoreVolt 2 Technology

REAL-TIME SSD POWER STABILIZATION FOR DATA AND DEVICE PROTECTION

Unstable power can corrupt data, disrupt operations, and shorten SSD lifespan. Apacer's patented CoreVolt 2 technology (Patent No.: I864916, China) provides real-time power stabilization to ensure stable SSD operation and data protection.

Real-Time Voltage Detection

Monitors power input and identifies voltage drops, surges, or irregularities the moment they occur.

Instant Power Compensation

Built-in tantalum polymer capacitors provide temporary power to stabilize SSD operation during voltage fluctuations.

Data Corruption Prevention

Ensures in-progress data transmissions are completed safely, preventing data loss or corruption.

Enhanced Device Stability

Safeguards against power instability, ensuring stable SSD performance and reducing the risk of downtime.

Product Specification

Model Name	SV25V-25
Form Factor	2.5"
Interface	SATA 3.2 (6Gb/s)
NAND Flash Type	3D TLC
Capacity	120GB~1920GB
Max. Sequential R/W (MB/sec.)	Up to 500
Max. Random R/W (IOPS)	64K
External DRAM Buffer	No
Operating Temperature (°C)	STD: 0°C ~ 70°C WT: -40°C ~ 85°C

In a World Where Data Drives Every Decision,

Apacer leads in SSD and DRAM innovation, providing advanced solutions tailored to both consumer and industrial needs. From specialized applications to entertainment, we ensure fast, reliable storage and processing.

More than just products, we partner with you to solve challenges, optimize performance, and future-proof your operations. Our commitment to excellence empowers you to unlock the full potential of your data.

Access the Best — Where Reliability Meets Innovation.

“At Apacer, innovation is at the heart of everything we do. We're unlocking the full potential of data, no matter where it resides, and delivering transformative solutions that drive business growth and enrich lives worldwide.”

Gibson Chen
President of Apacer
