

Professional Choice

CFexpress Type B
PA32CF Card

Ultra-high Performance, Extremely Low Latency

Apacer's CFexpress Type B cards are lightweight and extremely durable. They adopt only high-endurance NAND Flash ICs and also make use of high-speed PCIe Gen 3x2 interfaces, its excellent reliability and fast read/write speeds have made it a favorite among cinematographers.

Flawless 8K Capture

The continuous read/write speeds can reach up to 1,700 MB/s and 1,200 MB/s respectively, meeting the needs of next-generation high-speed cameras. They support 4K and 8K video capture as well as firmware adjustment for mainstream camera equipment, delivering a higher level of image detail and post-production tolerance.

*8K high-level setting parameters are 8K-D / RAW. This data is based on internal testing. The test results will vary with different capacities, models or usage conditions. It needs to use 256GB or more for 8K video recording.

Product Advantages

- Apacer professional high-endurance series
- CFexpress 2.0 Type B card
- The continuous read/write speeds reach up to 1,700 MB/s and 1,200 MB/s
- Support 4K and 8K video shooting
- Provide 128GB/ 256GB/ 512GB/ 1TB
- Apacer's SSD Utility Monitors CFexpress Card

Military-grade Shockproof and Anti-vibration Standards

Shockproof and anti-vibration protection are major features of the CFexpress card. The card has passed the MIL-STD-202G drop test and the MIL-STD-810G anti-vibration test, meaning it meets two of the US military's standards. The CFexpress card is extremely sturdy and durable, and designed to perform reliably while filming extreme sports or capturing extremely long exposure shots in the wilderness.

Plugged and Unplugged More Than 12,000 Times

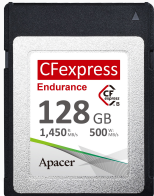

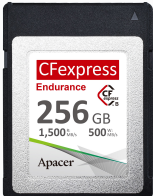

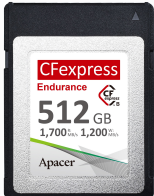

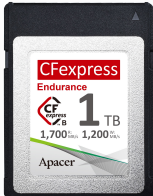

The CFexpress card has passed many other rigorous tests in the laboratory and complies with the CF Association's specifications. It has been proven to keep working even after being plugged and unplugged more than 12,000 times, so professional photographers can use it with peace of mind.
